administration

Our richest inheritance as Americans is the right of every individual to develop ideas.

The vast wealth of the people, the great physical achievements since the birth of our nation may blind us to the fact that these physical achievements are a by-product.

America has been improving--and is still proving on an expanding scale--that if millions of people have individual liberty and freedom of opportunity, they will generate a productive force such as no other nation in the world has ever seen before.

T. H. JENKINS
SUPERINTENDENT

Each activity and event portrayed in this annual exemplifies student growth according to democratic standards and ideals. May each memory aroused by browsing through these pages be centered around those things which make a better world. Citizens of tomorrow have many things to be proud and thankful for, so take a good look at a few of them in this annual.

The staff and sponsor are to be congratulated for an excellent job in producing this annual.
